

Snow Routes & Service

During snowfall or icy conditions, Everett Transit may use the route adjustments on the following pages.

How snow routes work:

1. Snow routes will be determined on a route-by-route basis, which means one route may be assigned a snow route while other routes are operating normally.
2. Each affected route will be assigned a letter, “A” or “B” indicating which section of the route will be affected.

For example: Route 18 has two sections of roadway where snow accumulation compromises safety. During snow events, we may announce that Route 18 West is operating “Snow A,” “Snow B,” or both.

3. Once declared, a snow route will remain in effect for at least four hours.
4. Route information will be updated on EverettTransit.org, [Facebook.com/EverettTransit](https://www.facebook.com/EverettTransit), and [Instagram.com/EverettTransit](https://www.instagram.com/EverettTransit), and can also be accessed via our customer service phone line at 425-257-7777 during normal working hours.

Please be aware:

- Routes not shown in this book may be placed on a snow route depending on road conditions.
- Snow and icy conditions may cause delays to bus service even if routes are operating normally.
- Do NOT use Everett Transit Arrivals when snow routes are in place. The times will not be accurate, as the system cannot be updated for the short timeframes of the detours.

Find up-to-date information at:

- **EverettTransit.org**, click on Rider Alerts. Sign up to receive rider alerts by text or email at EverettTransit.org/alerts.

TIP: Be visible on dark, winter days by using a flashlight.

TIP: Take an earlier trip, snow can cause slow traffic.

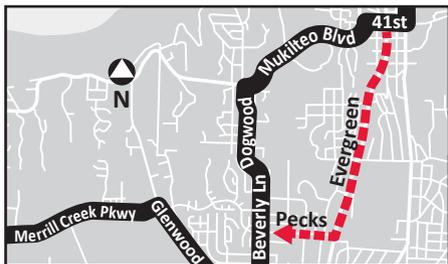

TIP: Dress warmly, even a short wait can be dangerous.

3

Snow Route

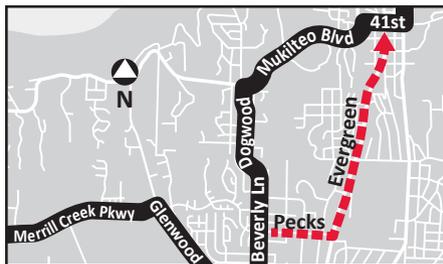

SOUTH

NO 41ST/MUKILTEO BLVD THROUGH FOREST PARK
